Business Contract Opportunity

UK

Opportunity Title: **Interior furniture for motor yacht industry**

Design Drawing Services are looking for a UK manufacturer to produce:

- interior furniture for the motor yacht industry
- using hardwood solids and veneer faced WBP plywood
- capable of spray finishing using PU and high gloss polyester, clear and colours mixed
- ability to view 3D models and convert to CNC nested components to reduce waste
- be able to think outside the box and look to the future - have the ability to advise on new manufacturing methods effectively without compromise

Project 60FT Motor Yacht built in UK

- 85 pieces of furniture covering 9 cabin areas
- capacity to produce and store 85 pieces of furniture every three months
- delivery in two stages
- stage 1, 36 pieces
- stage 2, 4 weeks later 49 pieces
- all furniture wrapped, packed and clearly labelled

Drawings are already produced using Auto-CAD and Solidworks. The company would like to move over fully to 3D, supplying the contractor with a single 3D model, basic drawing and specification rather than spend long hours producing 2d layout drawings.

If you can help and would like to receive a few drawings to price, please reply:

Commodity spot prices updated

The commodity spot price service has been updated in the confidential [members' area](#) of the BFM web site. We have added a new item **leather** of which there is 9 different categories. (The exception to the update is the Log category which we are expecting soon). An example from the leather category is below:
